

Temperature and moisture conditions over a long period of time

Climate

Atmospheric conditions at any given time

Weather

Long period of time without enough precipitation

Drought

Predict what will happen

Forecast

The edge of two air masses

Fronts

How much water vapor is in the air

Humidity

The force of air pressing down

Air Pressure

The study of weather

Meteorology

Someone who studies and/or predicts weather

Meteorologist

A front between warm and cold air masses that is moving very slowly or not at all

Stationary Front

How much heat is in the air

Temperature

How fast the wind is blowing

Wind speed

The gases/air that surround earth

Atmosphere
